PROFESSIONAL SUMMARY

SOC-focused cybersecurity analyst with hands-on experience investigating security events using Wazuh and Splunk (BOTS v3). Skilled in detection engineering, log correlation, and alert analysis to identify attack patterns such as brute-force activity, suspicious logins, and privilege escalation in Active Directory environments. Demonstrates strong capability in incident triage, escalation, and containment aligned with NIST and MITRE ATT&CK frameworks.

TECHNICAL SKILLS

SIEM: Wazuh | Splunk | Sysmon | Detection & Analysis: Log Correlation | Alert Triage | Threat Identification | Active Directory: BloodHound Analysis | Privilege Escalation Paths | Vulnerability Management: OpenVAS (Greenbone) | Networking: TCP/IP Fundamentals | Wireshark | Scripting: Bash | PowerShell (Basic)

PROFESSIONAL EXPERIENCE

SOC Lab Engineer (Self-Initiated Project)

Candor Labs | 2024 – Present

- Investigated simulated security incidents using Splunk (BOTS v3), identifying brute-force attacks and suspicious login patterns through correlation of authentication logs
- Built and configured a monitoring environment using Wazuh and Sysmon to collect endpoint logs and detect abnormal process execution and login activity
- Analyzed Active Directory attack paths using BloodHound to identify privilege escalation risks and potential lateral movement paths
- Conducted vulnerability scans using OpenVAS and reviewed findings to identify exposed services and weak configurations

Freelance IT Support & Cybersecurity Consultant

2022 – Present

- Provided IT support and basic cybersecurity services to SMEs, including system hardening and vulnerability identification
- Analyzed system logs and assisted in identifying potential security events during troubleshooting and incident response
- Configured Wazuh dashboards to improve visibility into system activity and support detection efforts

Education & Certifications

BSc Biotechnology and Bioinformatics – University of Eldoret

(2015) | CompTIA Security+ (2025) | ISC2 CC (2025) | Fortinet Fundamentals (2026) | LetsDefend SOC Analyst (2026)
